...Still the best after all these years!

By Perpetual Student

I think this is the best book out there, and I probably have them all. What worked for me was to take the 4 Seasons with me when I went shopping. Eventually I was able to train my eye to know what Season I was looking at, regardless of the lighting in the stores. The day I went shopping, looking for a Winter turquoise top, showed me it's value. From the middle of the store, I looked at the women's department, and said, Ahh, they're all Autumn turquoises. Phooey. I never even left the main aisle . It was kind of a disappointment. There was no reason to even browse.

I also use this information for interiors. A relative was redoing her home and debating between gray and beige for the living room. She had been told that gray was "in", but she was hesitating. I asked her, do you look good in gray? She said, "no". Well then, don't use it. You don't want to walk out to greet your guests in an outfit that looks good on you, and sit down in a room in another Season that fights with you and what you are wearing. They need to go together. You want to look good in your own home. (Granted, if you have family, it may not be that simple.)

Fun and Helpful Book

By Chris

I read this book when it was new and all the rage, in the early '80s, and I really enjoyed it. Back then for whatever reason I never could figure out for sure what my season was, though. I thought of the book recently and looked to see if it was still available. I was so happy to see that it was being sold on Amazon. I ordered it and read it through almost nonstop! It's a fun and easy read. I don't have any doubt now that I'm an autumn! About 2/3 of my clothes are the wrong color. I have separated them out from the right colors and gotten rid of some. I am on a mission to replace the wrong with the right until I am completely "autumnized." I have clothes shopped once recently and I couldn't believe how easy it was! Once you know your colors you can eliminate what doesn't look best on you and hone in on the right colors. And even better than that, nearly everything you have will coordinate! When I look at the grouping of right colors in my closet, it looks so harmonious, and I truly look and feel better wearing my colors. I highly recommend this book! P.S. If you're worried about the book being dated, it's not. Knowing how to dress yourself properly never goes out of style!

Color can take the lines out of your face!

By MsDeeDee

I think I first bought this book back in the 70's and then again in 2000 something (LOL) At first glance I was intrigued by authors scientific approach to using color to bring out ones natural coloring and beauty. The use of color to bring out our innate personality. Color using a set of colors that would work consistently in beatifying me thrilled me to no end. I had noticed that there were certain colors that seemed to always get me compliments. The fact that the compliments were given on two levels and that Color Me Beautiful book would help me identify the compliment that was solely because the color made me look lovely as opposed to someone just liking a color I happen to be wearing. Even if a color looks great in the department store, it is still a good idea to check the color in the sunlight if you can. Looking always for a color that reflects your face in a better light, does not turn you green or gray or bring out the lines in your face if you are a mature woman like myself.
