Throughout the 267-page report compiled on the Penn State scandal and the coverup of the Jerry Sandusky child abuse, it is one line that cuts to the heart of why America is in so much trouble: "A culture of reverence for the football program that is ingrained at all levels of the campus community." Paul Kersey dares take you down the rabbit hole and show you how far that reverence for college football goes on the campuses of some of America's best colleges and universities. And in the process, he clearly shows that a new form of discrimination has emerged; that against white high school athletes. The godfather of college football recruiting, Tom Lemming, told the Chicago Sun-Times in 2009, "College recruiters talk off the record to me," said Lemming. "They talk off the record that if an athlete is white, no matter how great his production, they won't recruit him." "On his annual coast-to-coast trips to evaluate the top 1,500 prospects in the country, Lemming sees hundreds of white tailbacks who are very productive but few get a chance in college." Paul Kersey will show you the ramifications of majority black major college football, where the Southeastern Conference (SEC) went from all-white teams up until the early 1970s to fielding squads of almost black starters who rely on "special admits" to gain acceptance to the university.

Great Read

By WotansSohn

The organization is a little bad and some of it is redundant (having been taking from an online blog), but the basic message of the book is why I gave it a 5 stars.

I grew up in a southern family where college football was god, but after attending college myself and seeing first hand and attending a few classes with the "special admin" football squad and basketball squads I soon realized that their presence on a college campus was an insult to me and my hard work to get to this place. Is a college an institution of higher learning or is it a training facility for professional sports? I'd recommend this to anyone interested in Human Bio-Diversity, collegiate sports, or the decline of the south and traditional American culture. Paul does do a good job of addressing these divergent themes and weaving them together.

This book has convinced me that the NCAA needs to reform its ways (disband it?) before you ever see me taking time out of my life to watch these people compete. Sorry BCS and March Madness but I'm not mad about your BS!

EYE OPENER

I was a typical flower child of the 60's with the I "love everybody and everybody loves me attitude " until I went to college and had a wake up call.

The football players were treated as celebrities and given special "dispensation" because they had good hands and fast feet.

I struggled through 4 years of tough academics (plus working after class) before I finally received my B.A. Initially I admired and respected the athletes for being able to balance football practice, ball games and maintaining passing marks until I found out the truth. With one or two exceptions the "jocks" rarely came to class yet miraculously managed to keep their grades up. I soon found out the truth. It's called a DOUBLE STANDARD. If you were a star player you graduated. Period.

One time our professor had us swap test papers and score them. I got the paper from the student next to me who was an outstanding football player but could only spell his own name correctly. A 20 year old college freshman whose test paper looked like it was written by a second grader. I discovered this guy could not spell, and had no clue about simple grammar or punctuation. But he could sure play ball. His major, physical education, surprise surprise!!

This was the first time I realized that the American educational system was in big trouble. Mr. Kersey does a much better job than me describing this phenomena. Several years ago I read the book OUT OF BOUNDS about this same subject but not as good as this book.

I had a tough time in college but I earned every A I made the hard way, by studying my butt off.

Just listen to the half-time interviews with the ball players and you can understand why this country's educational system is a failure.

I've been to Europe a number of times and it is amazing that the students over there speak several different languages.

It is embarrassing that a 16 year old German student speaks better and proper English better than our own school kids do.

Another solid reason to boycott the American "Higher Education" establishment.

By E. H. Ellis

The book title is an assessment of the tailgate party crowd. The book contents explain why. One of the reasons college costs have become ruinous to most American students is that they are supporting a huge parasitical obscenity - the collegiate sports program.
