PACKRAFTING! is about exploring wilderness and whitewater by packraft, a lightweight, portable boat usually weighing less than five pounds. Written by well-known packrafting instructor and adventurer, Roman Dial, this is the first book published on the topic. The slim volume offers both stories and instruction with full-color photographs from trips around the world. Dial shares information about gear and technique as well as the many applications for using small, packable boats. Packrafting can be combined with mountaineering, backcountry skiing, mountain biking or trekking as part of long expeditions, or short day trips.

Game changer for pack rafting newbie. Not only accelerated the learning process, but presented myriad helpful hints and stories about a few trips we have planned for the coming year. Will be turning back to this book again and again.

Informative, nice to look at, fun to read.

By Hari Seldon

As described by the eminent outdoorsman-writer Jon Krakauer in the preface, the book's author, Roman Dial, ranks high among the elite wilderness adventurers. He is also a pioneering proponent of packrafting.

Packrafters enhance and accelerate their treks by including in their packs a lightweight inflatable one-person raft with a collapsible kayak paddle. Their little boats can transform treacherous water barriers into paddling playgrounds. Unexplored areas are suddenly readily accessible via rivers and lakes. With its small size, impressive utility, and addictive convenience, the packraft seems a hiking equivalent of an iPod.

The book has two parts:

1. The Philosophy, Equipment and Technique of Packrafting
2. Packrafting Adventures

Part 1 covers packrafting's recent genesis, its required equipment, and how to properly use the gear under varied water conditions. It also provides advice for planning your packrafting trip.

Part 2 contains narratives of a few of the author's own packrafting adventures---in areas from Alaska to Mexico. The author, who has published articles and photographs in magazines that include National Geographic, Smithsonian and Outdoors, writes skillfully with a pleasant cadence. Consequently, his love and knowledge of the outdoors come across loud and clear. The book also boasts several beautiful photographs.

I found it very informative, nice to look at, and fun to read.

Great Read

By Erik Halfacre

Having not yet packrafted myself, this book opened my eyes to the immense new possibilities for backcountry travel opened up by the packraft. The book is laid out almost like one long magazine article, with lots of great large photos and frequent pull quotes. This makes it a quick read, but still jam packed with good solid information as well as interesting tales of Roman's trips with the small inflatable craft. If you want to get into packrafting you need to get this book.
