Have you known why you read this *Social Psychology (Third Edition) By Thomas Gilovich, Dacher Keltner, Serena Chen, Richard E. Nisbett* for?

About the Author

Thomas Gilovich is Professor of Psychology and Co-Director of the Center for Behavioral Economics and Decision Research at Cornell University. He has taught social psychology for 33 years and is the recipient of the Russell Distinguished Teaching Award at Cornell. His research focuses on how people evaluate the evidence of their everyday experience to make judgments, form beliefs, and decide on courses of action. He is a member of the American Academy of Arts and Sciences and a fellow of the American Psychological Society, the American Psychological Association, the Society for Personality and Social Psychology, the Society of Experimental Social Psychology, and the Committee for Skeptical Inquiry.

Dacher Keltner is Professor of Psychology and the Director of the Greater Good Science Center at the University of California, Berkeley. He has taught social psychology for the past 21 years and is the recipient of the Distinguished Teaching Award for Letters and Sciences. His research focuses on the prosocial emotions (such as love, sympathy, and gratitude), morality, and power. Other awards include the Western Psychological Association's award for outstanding contribution to research, the Positive Psychology Prize for excellence in research, and the Distinguished Mentoring Award at UC Berkeley. He is a fellow of the American Psychological Association, the American Psychological Society, and the Society for Personality and Social Psychology. In 2008, the Utne Reader listed Dacher as one of the 50 visionaries changing the world.

Serena Chen is Professor of Psychology and the Marian E. and Daniel E. Koshland, Jr. Distinguished Chair for Innovative Teaching and Research at the University of California, Berkeley. She has taught social psychology for the past 18 years and is the recipient of the Distinguished Teaching Award from Berkeley's Social Science Division. Her research focuses on the impact of close relationships on the self and identity, and on the intrapersonal and interpersonal consequences of social power. She is a fellow of the Society of Personality and Social Psychology and is the recipient of the Early Career Award from the International Society for Self and Identity. The American Psychological Society also identified her as a Rising Star.

Richard E. Nisbett is Theodore M. Newcomb Distinguished University Professor of Psychology at the University of Michigan and Research Professor at Michigan's Institute for Social Research. He has taught courses in social psychology, cultural psychology, cognitive psychology, and evolutionary psychology. His research focuses on how people from different cultures think, perceive, feel, and act in different ways. He is the recipient of the Distinguished Scientific Contribution Award of the American Psychological Association and the William James Fellow Award of the American Psychological Society and is a member of the National Academy of Sciences and the American Academy of Arts and Sciences.

Fascinating insight into how we interact with each other

By Irene

Social psychology, unlike plain old psychology, details how we humans interact with each other. Can people be influenced to falsely confess? Does the presence of someone else nearby make you work better or worse? What kind of techniques can you use to convince someone?

In this very descriptive textbook, the basics of social psychology are outlined and the relevant studies are summarized. I often feel that psychology textbooks get bogged down in the specifics of the study and lose sight of the bigger picture. I am happy to report that this textbook avoids that trap. Each chapter has a theme (e.g. "Attitudes") and a concluding review section to revisit new concepts.

We used this textbook for my Intro to Social Psych class, and I was very pleased with it. Yes, it's a hefty price, but paperback is probably still cheaper than the hardback version!

I never write reviews but I had to recommend this book that kept me awake until late nights

By Adelante Cataforismo

One of the most interesting books I have ever read! It's not only a matter of personal interest though - they use incredible organization to keep us engaged. The chapters are divided by topics. First, they present a fascinating story of the particular topic and start the chapter by raising questions based on the story. The questions make us curious and they very often challenge our naive theories or common sense. Then, they proceed to answer the questions, showing the evolution of experiments. That is, they follow a line of argumentation, a quest of the researches that have tried to answer these questions, and many times the findings are contradictory! Or just apparently so, as you have to keep reading to find out what's going on. And after arriving at the last updates on research, they show a well-rounded perspective, with cross-cultural comparisons and the effects of class, gender and so on. I never write reviews but I had to recommend this book that kept me awake until late nights! It will not only provide you with multiple perspectives on social psychology research, but also help you understand other people and better your own life, everyone should read it!
