THE NEW TERRORISM: HOW TO FIGHT IT AND DEFEAT IT

BY VAN HIPPI PDF

In today's world, terrorism commands our constant attention. Few people in North America and Europe have the capacity to study and analyze the wide scale number and kinds of threats facing us as a civilization. Even fewer can make constructive suggestions on how to meet and eliminate these threats in an effective way. Van Hipp is one of those few. He discusses the full range of threats. Not just the constant threats of suicide bombers, airplane hijackings, and odious beheadings, but the threats from military and cyber-attacks. He stresses the need to upgrade our missile defenses, protect ourselves from cyber-attacks, and eliminate the danger posed by our porous borders. He calls on our national leadership to rise to the challenge posed by these dangers, and to undertake the steps that will protect us all from these threats. The book has a Foreword by Newt Gingrich.

Good read on the truth behind terrorism

By M. combs

I think this is an excellent book on terrorism. Van gives up an in depth look at what is happening in the Islam

world and the truth behind the myths. I would highly recommend this book to anyone who is interested in national security of our country. This book is well written and easy read. The timing of this book is right on with what is happening in our world today.

Quick read

By Paul G

Good info on current events in the world. The book is just one guys opinion but he has some great ideas and insight. Unfortunately American politics will prevent most of the ideas being considered. We wouldn't want to offend anyone in the name of safety for Americans now would we?

18 of 23 people found the following review helpful.

"The only source of knowledge is experience" Albert Einstein....you need to experience this

By A well informed citizen

This is an extremely informative read that goes to new depths on the topic of radical Islam. Other reviewers have thoroughly conveyed the relevance of this book on that matter, so I will touch on the fact that this book calls for a decreased dependence on oil and the development of the nuclear power industry. Regardless if you believe buying oil from countries that house these terrorist organization actually benefit those groups, oil reserves are finite. The world will eventually run out of oil and the industries that rely on that oil will cease to exist. Because of our society's heavy reliance on oil, America is heavily dependent upon other countries and in the unstable global economy, that is not a good place to be.

Nuclear power is the most "green" energy source that can efficiently produce power. It is greener than solar, wind, and hydroelectric and safer than oil refineries. There is a lot of hesitancy in America to further the nuclear industry after Three Mile Island (which resulted in 0 deaths) because of the way the media portrayed the incident. At that time the NRC (Nuclear Regulatory Commission) wasn't performing their duties to the standards that we as a society have come to expect. With that being said, the NRC has made huge steps to regulate the nuclear industry by placing heavy regulations on plants currently operating and even more stringent requirements for plants that are set for construction. Nuclear power is the way of the future and other countries, such as China, have already started making a huge push in that direction.

In summary, this book is a great read because it doesn't just talk about terrorism, it (as the title says) talks about how to fight and defeat it.
